

Kornucopia® ML™ Pricing

Effective Jan 1, 2026

(Applies to license periods beginning on or after January 1, 2026)

The Noisy Data Experts™

BodieTech.com

954-780-6181

All Kornucopia® ML™ licenses are yearly leases of the software based on tokens. Each user of the software requires 1 token during a usage session. See page 2 for more details.

Enabling Token

- The 1st token for any customer is always deemed the enabling token. It can be either 1 floating token or 1 node-locked token.
- **Price: \$4,175/yr**

The remaining options, floating and/or node-lock, are for token # 2 and beyond. Customers may lease any combination of these types of tokens.

Floating

- Tokens are served from the customer's server or based on USB dongle. One token per simultaneous user.
- **Price: \$4,175/token/yr**

Node-locked

- Each token is locked to a specific user (person) or lab computer by a local license file.
- **Price \$2,840/token/yr**

First Year Fee

- This fee only applies to the 1st year for a new customer.
- 1st token \$250, 2nd token \$125, 3rd through 5th tokens \$65 each.
- Purchase 5 or more tokens on one PO (or within 1 year) and all 1st year fees are waived.

Level II Tech Support (optional additional support purchased at \$360/hr)

- Advanced technical support for Kornucopia® usage including, but not limited to, development of Kornucopia® scripts to assist customers in specific analysis tasks based on the Customer's requests. Level II Tech Support is a supplement to the basic support & maintenance provided to Kornucopia® users.

Volume discounts (based on active tokens in a given year paid on a single invoice). Token ordering is Enabling token first, then all floating tokens, and lastly all node-locked tokens.

- Tokens 6 – 10: 10% discount applied to tokens 6 - 10.
- Tokens 11 and beyond: 20% discount applied to tokens 11 and beyond.

Notes:

- License leases are typically for 1 year. Multi-year leases are available. When the license expires, the software stops working.
- Maintenance and technical support are included with the software license. While under license, customers receive access to the latest released software version, including all updates and applicable upgrades. Technical support is officially provided via email at support@BodieTech.com or info@BodieTech.com. Customers may also request support through the Contact Us page at www.BodieTech.com. If we have a customer's phone number, we may reach out to gather additional details to ensure the best possible support experience.
- Evaluation Licenses: Unlimited group access for up to a 2-month initial exploration trial period.
- Customer is responsible for obtaining the MATLAB® software on which Kornucopia® ML™ runs.

About Floating and Node-Locked Licenses

- Floating tokens
 - Floating tokens serve many users with a few tokens. The entity leases several tokens based on the number of simultaneous users they want to support. Example: a group of 20 potential users with 5 floating tokens means that at any one time, only 5 of their users can use the software. After one of the users stops their Kornucopia usage session, the token they were using is automatically returned to the token pool for other users to access. The Kornucopia software handles all the token manipulation for the users. Floating tokens are served via a customer's Windows-based license server (can be a virtual Windows machine) running our Bodie Tech license server software (Kornucopia Floating License Server, KFLS).
 - Customers may enable token borrowing from their server-based floating license pool. Token borrowing allows a user to check out a token from the server and then be disconnected from the server during their borrowed duration. The server Admin has control over the maximum borrowing duration allowed.
 - A USB Dongle approach is also available for a floating license. Each USB dongle (provided by Bodie Tech) holds one token. The USB dongle approach requires no network connection to a master server, and it allows the customer to move the USB dongle to various computers in a lab setting, or similar, as needed.
 - Node-locked tokens
 - These tokens use a local license file bound to a specific computer and login credential. This type of license is good for a specific user or a lab computer with the same login credential for all lab users. There is no interaction with servers nor requirements for network connections for node-locked licenses.
- Companies with a mix of occasional and frequent users may elect to license a combination of floating and node-locked licenses.

About Level II Tech Support Option

- *Supplemental Service* – This support option is a purchased add-on to the standard support and maintenance included with a licensed Kornucopia® subscription.
- *Enhanced Technical Assistance* – Level II Tech Support provides advanced assistance for Kornucopia® usage, including but not limited to developing Kornucopia® scripts tailored to specific customer analysis needs.
- *Time-Based Support* – This support option entitles the customer to a specified number of hours of advanced technical support from Bodie Technology Inc., determined by the fees paid. A log of support incidents, including dates, hours, and a description of the support provided, will be maintained and can be furnished upon request.
- *Terms and Conditions* – Level II Tech Support is subject to the terms and conditions outlined at <https://bodietech.com/TermsConditions-KornLevel2Support>.
